

Assembling the Paperfox MPA-2 table on a Paperfox MP-2 paper punch

Assembling the Paperfox MPA-2 table on a Paperfox MP-2 paper punch

With the Paperfox MPA-2 table you can use your Paperfox MP-2 paper punch more comfortable and more accurate.

Mounting the MPA-2 table on a Paperfox MP-2 paper punch

Mount the aluminium profiles on the MP-2 machine frame with the two M8 screw.

Use a 13mm wrench to fix the screws.

If you cant screw this screws back to the whole, then disassemble the top part of the paper punch and loose the other two M8 screws.

Place the MPA-2 table on the aluminium profiles and fix it with the two M6 screws.

Use the M6 mothers and washers.

Use a 10mm wrench to fix the srews.

Assembling the Paperfox MPA-2 table on a Paperfox MP-2 paper punch

The two M6 screw on the front side of the machine just supports the table. The front side of the table is not fixed with screws, so do not lift the machine holding the table.

Mount and position the side guides.

You can mount the paper guides parallel as in the picture.

You can use this configuration at calendar punching, euro slot punching and at the most punching tasks.

You can mount the paper guides rectangular position.

You can use this configuration at rounding, punching or cutting corners.
